## Micromotors | Coreless BLDC motors | SVTN A 01-2260-12-S-O

Coreless BLDC motor.

High Power Density -High Efficiency - Cost Effective Low noise - Low inductance - Good Heat Dissipation Long Lifetime -No Cogging -Low Inertia -**Robust** 

#### SVTN A 01-2260-12-S-O

Nominal voltage 12 V

**No load speed** 16360 rpm

**No load current** 440 mA

Nominal speed 14517 rpm

Nominal torque 28.000 mNm

Nominal current 4.490 A

Stall torque 249.000 mNm

Stall current 36.400 A Max. efficiency 79.200 %

Terminal resistance\* 0.300?

**Terminal inductance\*** 0.030 mH

**Torque constant** 6.920 mNm/A

**Speed constant** 1380 mNm/V

**Notice:** The provided technical data are the higher limits recommended in static condition. To obtain the correct dimensioning of the product, it is necessary to hold account of all the applicable dynamic forces, including the inertia of the manipulator, the configuration of the tools and the external forces applied.

## 2 Pole Brushless DC Motors

SVTN A 01-2260-12-S-O

**Speed/torque gradient** 65.80 rpm/mNm

**Mechanical time constant** 3.100 ms **Rotor inertia** 4.500 gcm<sup>2</sup>

The bene?ts of this new technology are torque and high-speed when compared to the same sizing. The lack of cogging, a reduced ripple torque, a linear correlation between speed and torque, low inertia bring performance to a greater level in terms of power, dynamics by means of

reduced weights and reduced dimensions. Servotecnica's brushless motors apply hall sensors as a standard option, in addition to having the magnetic encoder option. Thanks to the sensors it is possible to control rotation speed, and, thanks to the lack of cogging, provide high performance and accuracy.

### Advantages

Benefits

- Winding technology without metal bodies
- Good heat dissipation and high overload capacity
- Long life expectancy

- Light and compact, easy integration
- High reliability
- Good return on investment

# expertise in connectivity
