# Manual Robotic Tool Changers | Hybrid Interfaces Modules | MEK125

Sous titre

MEK125: Electric/pneumatic/fluid anodized module with PK2-PK4 connectors

Le module MEK125 permet la transmission simultanée d'énergie, d'air et de vide, avec différentes versions disponibles pour répondre à vos besoins. Augmentez votre productivité avec des connecteurs robustes et une flexibilité accrue dans les connectiques de sortie.

Discover the MEK Multi-Energy-Coupling, the accessory of MGW changers that allows the simultaneous transmission of energy, air and vacuum. With its many advantages, it extends MGW mechanical interfaces and replaces additional connections. In addition, it transmits compressed air and vacuum from the upper assembly to the lower assembly and conducts 12 electrical signals. Available in different versions to meet your specific needs. Contact us for custom applications. MEK Multi-Energy-Coupling (for MGW, SWS) - Air, energy and vacuum. Versions available: 4 air passages, 6 or 12 electrical spits or 4 air passages and 6 electrical spits.

### **Advantages**

## **Benefits**

- Increased productivity with robust connectors
- Great flexibility in output connectors
- Reduced maintenance times with a high cycle rate

#### **MEK125**

Operating temperature -30 to +120 °C

**Type** Hybrid Interfaces Modules

**Protection rating** IP40

**Weight** 0.300 0.150

Contact durability 50000 cycles

Materials Al, anod.

Operating pressure -1 to 8 bar

**Pneumatic Ducts** 4 to 8 x PK2, PK3,PK4

Electrical Ducts 12 x 9A (63V, 3m?)

6 x 20A (125V, 1.3m?)

**Notice:** The provided technical data are the higher limits recommended in static condition. To obtain the correct dimensioning of the product, it is necessary to hold account of all the applicable dynamic forces, including the inertia of the manipulator, the configuration of the tools and the external forces applied.
